

Lock In

Skip the portal. Grab your desk.

Free for UNIVPM students · works on iPhone

Set it up in 4 steps

1

Get Scriptable

Free on the App Store. It **runs** Lock In.

2

Get Lock In

Tap **Lock In** on the blog, then **Add Shortcut**.

3

Run it, once

Scriptable opens and Lock In **starts by itself**.

4

Sign in

Your **UNIVPM login** (capital S, then your serial). Then **allow location**: the owl tap needs it.

Add the widget

Hold the home screen, tap +, pick **Scriptable**, choose **Large**.

Point it at Lock In

Edit Widget, set **Script** to **Lock In**, pick your home campus.

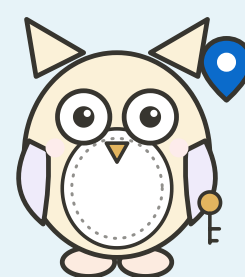

Then just tap

Torrette **Medicina** >

Villarey **Economia** >

Montedago **Ingegneria** >

Tomorrow >

Tap the owl. Near home it books your campus. Far away, it suggests the closest.

Private, by design

Stays on your phone

Your login stays in the iPhone's secure storage, sent only to UNIVPM.

Location is local

Used on your phone to find the nearest campus. Never saved or sent.

We see nothing

WalexLabs never receives your login, bookings or location.
